

Ms. Becca Ms. Kate

Here are some examples of activities that we do in Room 6

We explore using different materials and learn how to classify, pattern, paint, imagine and create new things everyday! We love learning together in our classroom community!

These are our
classroom pet
goldfishes!
Their names are
**Sprinkles and
Goldie.** The
children feed
them each day
and check in on
them in the
science center
during work time.

This is our classroom block area.
It has plenty of space to build,
imagine and pretend.

The children eat a meal in the classroom and also use these tables for art projects and small group time.

This is the dramatic play area. Children can use the props, costumes and play furniture to play pretend. It is transformed throughout the school year to be a farm, rocketship, house, grocery store, pizza parlor and more!

This is the reading area where children can cozy up with a book.
